UTKARSH RAJ

Associate Data Analyst | Statistical Analysis, SQL, Power BI, Python, Machine Learning

Bengaluru || 8308264817 || utkarshrajsrivastava94@gmail.com || LinkedIn || Portfolio || GitHub

TECHNICAL SKILLS

Data Analysis & Methods: Data Cleaning & Pre-processing, NumPy, Pandas, matplotlib, Exploratory Data Analysis, KPI Analysis
Programming & Querying: Python, SQL (Advanced), NoSQL, PostgreSQL
Business Intelligence & Visualization: Power BI, DAX, Tableau, Microsoft Excel (Advanced)
Machine Learning: Regression, Classification, Clustering, scikit-learn
Soft Skills: Analytical Thinking, Stakeholder management, Perseverance, Problem-Solving, Adaptability & Growth seeking Mindset,

PROJECT-BASED INTERNSHIPS

ReadableAI | Remote
Data Analyst intern (paid) | June 2026 – present

- Launched and managed brand presence across Reddit, Quora, and client subreddits for 4 e-commerce and B2B clients, building visibility from zero in the sources AI search pulls from.
- Turned high-performing posts into reusable prompt templates and automated the workflow for consistent, on-brand output at scale.
- Tracked engagement in Excel and Power BI to identify winning content and communities, then refined prompts and posting strategy to strengthen AI search visibility.

Learnbay | Remote
Data Analyst apprenticeship | June 2025 – Feb 2026

- **Business Intelligence:** Developed Power BI and Excel dashboards to visualize KPIs and performance trends for client-style problem statements
- **Statistical Analysis:** Leveraged SQL and Python to clean and analyze real-world datasets, delivering actionable business insights
- **Domain specialization:** Agriculture, Sales, BFSI

Feynn Labs | Remote
Machine Learning Intern (Market Strategy) | Jun 2023 – Aug 2023

- **Strategy Analysis:** Conducted intensive market research and customer segmentation using clustering to support EV market positioning
- **Feature Engineering:** Applied EDA to complex datasets to drive data-driven targeting decisions

PROFESSIONAL EXPERIENCE

Independent Solutions Consultant (Freelance)
AI Automation & Data Strategy | Aug 2024 – Jan 2025

- **Marketing Strategy Engagement:** Engineered autonomous OpenClaw agents for a Digital Marketing agency to automate Google Ads bidding and quality audits, directly lowering CPCs and increasing conversion rates
- **Product UX Engagement:** Developed an interactive Plotly-Dash navigation system for a data science professional to optimize survey user experience

John Energy Ltd | Barmer Base Office
Drilling Operations Analyst (Field Mechanical Engineer) | Aug 2017 – Jul 2020

- **Operational Excellence:** Analyzed drilling and logistics datasets with Excel and to identify bottlenecks, resulting in a 20% improvement in operational efficiency
- **Cost Management:** Monitored Non-Productive Time (NPT) and spare usage to drive an 18% reduction in costs, saving the firm over ₹35 Lakh during commissioning stage
- **Reporting & Strategy:** Managed MIS/ERP data reporting on inventory levels and equipment failure rates through Power BI dashboards to enable proactive maintenance.
- **Logistics Analytics:** Optimized rig movement schedules through strategic planning, reducing transit delays

TECHNICAL PROJECTS

- **Drilling Non-Productive Time (NPT) Analysis: Volve Oil Field | Live Dashboard | Python, PostgreSQL, SQL, Power BI, DAX**: Classified 23,000+ drilling activities across 26 wellbores to show 20% of rig time was non-productive, traced 60% of it to two causes (equipment maintenance and weather), and built a star-schema database with Power BI and web dashboards
- **Patient Encounter Cost and Risk Analysis | SQL, Power BI, Excel :** Analyzed patient encounters, procedure costs, and coverage gaps to surface financial risks and guide smarter cost control across healthcare organizations.
- **Predictive Fraud Detection for ATM Transactions | Python, pandas, Scikit-learn:** Built a reliability-focused model to identify ATM transaction fraud using imbalanced data handling
- **Sales Performance & Retention Analysis | SQL, Power BI, Excel:** Analyzed customer churn and revenue leakage to create executive-level tracking dashboards
- **Agricultural Productivity Analysis | SQL, Power BI, Excel:** Identified seasonal productivity trends to support targeted resource planning
- **EV Customer Segmentation Analysis** | **Python, Machine Learning:** Analyzed market data using clustering techniques to understand demographic and behavioral patterns and generate data-driven insights supporting market positioning

EDUCATION & CERTIFICATIONS

- **B.Tech in Mechanical Engineering:** Babu Banarasi Das University, Lucknow (2012–2016)
- **Professional Certifications:**
  - IBM Data Analyst Professional certification
  - IBM Data Visualization with Cognos Dashboard
  - Advanced SQL & MongoDB (Learnbay)
  - Statistics & Machine Learning (Learnbay)
  - Tableau & Power BI for Data Analytics (Learnbay)
